Completion certificate of preventive rail grinding works
for the project Stara Pazova – Novi Sad in Serbia ref. nr. 169-2023

Service Agreement date: 11/09/2023
Complete Grinding length: 83.548 meters track
Service Period: start 10/01/2024 end 01/03/2024

the undersigned Nikola Arsenović as Technical Director declare that Mecno Service used the tangential grinding machine MECNO MS14S for the Preventive rail grinding works on the project Stara Pazova – Novi Sad in Serbia ref. nr. 169-2023.

The scope of works comprised the grinding of UIC60 rail type and was carried out in two passes. In both pass the entire rail head was grinded and a material removal greater than 0,1 mm at a speed of 1200 m/h was recorded.

ZGOP DOO is completely satisfied with the productivity and grinding quality produced by the machine MECNO MS14S which met the project requirements and those of the EN13231-2 for rail grinding works.

Yours faithfully

Technical Director

Nikola Arsenović
